

Welcome to the first Tech-Aware for 2016.

If you are considering Arc Flash protection for your power systems or have existing arc flash protection, in edition 9, we cover the comparison between the Littelfuse Arc Flash units: PGR-8800 and the *newer* AF0500.

For a comparison on these units, please click on the link below to take you directly to the Littelfuse Arc Flash web-page, then click on "*Click to compare relays*".

<http://info.littelfuse.com/arcflash>

In addition to the technical aspects, the AF0500 also offers nearly a 20% reduction in cost over the PGR-8800.

On the same Arc Flash page as the comparison, you will find **Videos, Case Study, Industry Awards for Arc Flash protection, Arc Flash Calculator, Data Sheets, manuals and Application Guides.**

We hope this is helpful in selecting an Arc Flash unit to suit your facility's needs. For further information, to arrange a demonstration or any other product requirements, please contact Startco Pty Ltd.
